

Liquids to Value

Service Department

For Your Preventative Maintenance and Training Needs

GEA Tuchenhagen is a global leader in the manufacturing of a wide range of sanitary flow components for the dairy, food, beverage, brewing and pharmaceutical industries.

Reliability

At GEA Tuchenhagen we aim to supply the best and most reliable process components available on the market. And now our Service Department is able to provide the knowledge and experience to optimize and extend the life of your process equipment to give years of production.

How You Benefit

Our expertise will minimize the down time necessary to maintain those critical components on an individual basis, a process line or entire plant. With strategically based Service Offices in the US, we can offer you a single point of contact to develop the relationship and knowledge that is specific to your needs.

Planning

We can arrange an inspection of your plant to give an overview of the status of your equipment. We can perform spot checks to identify the condition of seals and wearing parts and then develop a plan which is tailored to your needs.

For service and training, call 207.797.9500, then choose option 2 or email us at service.TNA@geagroup.com

Service Details

- Replacement of worn parts
- Cleaning of product contact parts
- Calibration where required
- Functional and leakage tests
- Documentation of the work carried out

Spare Parts

Your components will only be fitted with original GEA Tuchenhagen parts.

Training

We are able to offer operator level and advanced maintenance level training. The training courses are tailored to suit those specific components in your plant and make use of cut section parts and actual gaskets for in depth trainee understanding.

Operator Level

These training courses equip plant operators with the knowledge to set up and monitor individual components in their care.

Maintenance Level

These courses provide the maintenance personnel with the necessary skills to strip down and repair components. Basic trouble-shooting and in-depth knowledge of component operation are also provided.

Courses can be held at your plant or at any convenient location.

Other Services

Our experienced, factory-trained staff is able to offer assistance in providing you with the solutions you need for commissioning, trouble-shooting or product selection.
